B.S. in Web & Design Development

Graduated 2022 · Utah

## AI-ASSISTED DEVELOPMENT

Tools I use to prototype, debug, document, and ship software faster.

- Claude
- Codex
- Antigravity
- Kimi 2.0

## PROFESSIONAL SUMMARY

Full-stack developer who ships production software end to end — from architecture and UI to deployment. Builds **scalable SaaS** platforms, **AI-powered automation**, and reliable **business systems**. Strong experience creating modern user interfaces, professional **WordPress** builds with custom code, and turning business problems into well-engineered software.

## EXPERIENCE

### Co-Founder & Full-Stack Developer 2021 – Present

Evano Development | Utah (Remote)

- Designed and launched multiple live **SaaS platforms** end to end — from UI and architecture to APIs and deployment.
- Built AI-driven automation and CRM tools integrating OpenAI GPT, local LLMs, and Meta / WhatsApp APIs.
- Developed professional **WordPress** sites enhanced with custom code — combining WordPress with hand-written code to deliver more advanced, tailored projects.
- Delivered multi-tenant products with real-time data, OAuth 2.0, and serverless infrastructure on Firebase.

### Dynamics 365 Expert 2023 – 2025

Mrs. Fields | Utah

- Maintained reliability of the **Dynamics 365 CRM/ERP** system supporting day-to-day business operations.
- Designed and built new internal workflows to streamline orders, inventory, and customer data.
- Integrated Dynamics 365 with **Shopify Plus** to sync e-commerce orders, products, and customers, keeping teams unblocked and systems healthy.

## SELECTED PROJECTS

### Evano Studio

evanostudio.com

Open-source desktop app to build and run local AI agents privately — no cloud or API keys.

Tech: Ollama · ChromaDB · SQLite · Desktop

### CrewX

crewx.space

Omnichannel AI CRM unifying Facebook, Instagram & WhatsApp into one inbox with GPT assistants.

Tech: Next.js · Firebase · OpenAI · Meta APIs

### EvanoTask

evanotask.com

Habits, tasks & personal-finance app on a single calendar — on web and native iOS.

Tech: Next.js · React · Native iOS · Real-time

### El Inka Envíos

inkaenvios.com

Logistics platform for US → Latin America shipping with calendar-based scheduling and tracking.

Tech: Next.js · Tailwind · Scheduling

+ Evano Development studio site (evano.dev) and 70+ public repositories at github.com/RaulMandujano

## WHY I STAND OUT

- End-to-end product builder
- Live SaaS experience
- Strong UI + engineering blend
- AI automation experience
